## Input Json structure:

```json
{
  "profiles": [
    {
      "id": 0,
      "answers": [
        {
          "questionId": 275,
          "answer": 2,
          "acceptableAnswers": [
            0
          ],
          "importance": 1
        },
        {
          "questionId": 3,
          "answer": 1,
          "acceptableAnswers": [
            1,
            3
          ],
          "importance": 1
        }, ...etc
```

## Output Json structure:

```json
{
 "results": [
  {
    "profileId": 0,
    "matches": [
     {
       "profileId": 2,
       "score": 0.87
     },
     {
       "profileId": 1,
       "score": 0.65
     },
    ]
  },
  {
    "profileId": 1,
    "matches": [
     {
       "profileId": 0,
       "score": 0.65
```

```
      },
      {
        "profileId": 2,
        "score": 0.5
      }
    ]
  }
 ]
}
```
